The group maintains the relevant **accreditations** and **several Notified / Assessment / Inspection / Certification Bodies**.

TÜV Rheinland Global Rail

- Regions and Offices

Clients are turnkey suppliers, system and component manufacturers, rail operators, leasing companies, investors, authorities and governmental organisations. The experts are providing services in the business segments of **civil engineering, assessment, certification** and **consulting**. TÜV Rheinland Global Rail serves the market segments of high speed and mainline transport, regional and urban transport as well as freight transport. Independent, competent, economic, sustainable: **Precisely Right**.

Rail Services around the Globe. Precisely Right.

TÜV Rheinland Global Rail is a Business Field of the international **TÜV Rheinland Group**. Since its founding in **1872** the enterprise stands for safety, quality and efficiency between man, technology and the environment and is present on all continents, with locations in **over 500 cities** in **69 countries**. TÜV Rheinland follows the clients on their paths of international expansion and is always aware of the

responsibility as a global company. The work boosts the economic success of the customers and secures employment and growth. Around the globe the **workforce is 19,700**. More than half of its revenues are achieved outside Germany. 16,581 km is the distance between Cologne Headquarters and the most distant office in Tomago, New South Wales, Australia. 2.625 m is the elevation of the “highest”

subsidiary in Bogotá, Columbia.

The global network of test facilities serves all industries and is comprised of 200 laboratories in 77 locations. The goal is to be the most successful, sustainable and independent service provider for **testing, inspection, certification, consulting** and **training**.

The 2016 group's total turnover was **1.91 billion Euros**.
