

Compliance Management System Certification

A certification of your compliance management system by TÜV Rheinland will document to your stakeholders that your company has implemented a robust and effective compliance management system.

TOP OF THE CLASS IN COMPLIANCE MANAGEMENT

Today, the compliance with a large number of external and internal rules and regulations forms the framework for responsible business practices and ensures sustainable corporate success. A robust compliance management system is essential to assess risks and avoid compliance breaches. It enables you to prevent damage to your image or to customers. By certifying your compliance management system, you can prove that your company has a working and effective system in place.

YOUR CERTIFICATION BY TÜV RHEINLAND

Compliance builds trust in your company both internally and externally. It is therefore worth actively communicating the topic to your customers, the public, authorities, and employees. A certification allows you to have your compliance management system audited for effectiveness and to demonstrate its effectiveness to your stakeholders. The certification is based on the TÜV Rheinland standard for compliance management systems. Upon successful completion of the certification, in addition to the audit report, you will receive your certificate and the test mark.

COMPLIANCE ALONG THE ENTIRE VALUE CHAIN

Compliance with all applicable regulations is not only relevant for your internal processes. Your suppliers also must be able to ensure smooth processes. TÜV Rheinland's overall concept therefore includes your closest partners in the certification process. This is how TÜV Rheinland ensures compliance continuity along the entire value chain.

THE CERTIFICATION PROCESS

1. Request a quote directly via our contact form at www.tuv.com/compliance-management. Or call us at +49 0800-888 2378.
2. Once your order has been placed, the audit is planned and carried out.
3. Upon successful completion, your company receives the certificate.
4. Annual surveillance audits support you in the continuous optimization of your processes.
